PERSONAL PROJECTS

Stamper- Employee Management Dashboard (08/2024 - Present)

- Link - <https://stamper.tech/en/login>
- Designed a multi-role dashboard for organizations, moderators, and employees using **Next.js**, **Tailwind CSS**, **Redux Toolkit**, and **ShadCN UI**.
- Features include geofencing-based attendance, task assignment, leave and payroll management, and role-based access control for multi-office setups. Integrated **Momentum**, **Mutation**, and **Context API** for real-time updates and efficient data synchronization across locations.
- The backend is powered by **Express**, **Mongoose**, **Bcrypt**, **JSON Web Token (JWT)**, and **Redis** for efficient caching and session management.
- The system streamlines workflows for HR, management, and employees in a scalable and intuitive interface.

Programmer Point - coding notes platform

- Link - <https://coding-notes.vercelapp/>
- Developed a coding notes platform using **Next.js** and **Acertinity UI** for a clean, user-friendly interface.
- The website provides comprehensive **coding notes** and **tutorials** across various **programming languages**. Integrated responsive design, allowing users to access the content seamlessly across devices.
- Leveraged modern web technologies to ensure fast performance and **smooth navigation**, delivering an engaging learning experience for **developers**.

Quick Meal - Food Delivery website (10/2024 - 12/2024)

- Quick Meal is a feature-rich food delivery app designed to provide users with a seamless and efficient experience.
- Built with **React**, **Context API**, and **TypeScript**, it ensures smooth state management and robust functionality.
- The sleek and **responsive UI**, crafted with **Tailwind CSS** and **HTML**, enhances usability and accessibility, making food ordering effortless and enjoyable.
- The backend is powered by **Express**, **Mongoose**, **Bcrypt**, and **JSON Web Token (JWT)** to enable secure, efficient, and scalable operations.
